

GA-687

GA-687 is an advanced halogen-free high Tg 190 °C(DSC) ultra low-loss multifunctional epoxy laminate. Superior electrical performance are suitable for high frequency high speed telecommunications. The characteristics of low transmission loss and low degree of distortion can be mainly suitable for base station platform, cloud computing, storage and advanced servers.

Key Features

- **Tg: 190 °C(DSC)**
This material with high performance multi-function resin , crosslink density is high. Material Tg values can reach above 190 °C(DSC).
- **Dk: 3.70 & Df: 0.0030**
Material has superior electrical properties, is conducive to the high frequency high-speed transmission, and high density wiring design. The lower signal loss can ensure signal integrity.
- **Z-CTE(50-260):2.2%**
Its remarkable very low expansion coefficient, is more suitable for making high multilayer PCB, ensure the reliability of high temperature welding and assembly process.
- **Td: 380 °C**
Excellent resistance to aging temperature, keep the material performance in high thermal shock or high temperature environment impact.
